TrueVoice: Empowering Independence Through Assistive AI

June 28, 2025
TrueVoice at BTS Aspire

Our mission

“Millions face daily frustration—not because they can’t do things, but because systems weren’t built to understand them.”

We’re building empathetic, adaptive support that restores confidence, dignity, and autonomy—for those who need it most.

The problem

Getting help today is **stressful, complex, and often demeaning** for:

- **Independent Seniors**
- **Neurodivergent Individuals**
- **People with Physical or Mental Disabilities**

Support systems are built for the **average user**—not the **actual needs** of these groups.

Caregivers and institutions also face growing burden and friction.

The frustration

“I don’t want help. I want to stay independent—I just need systems to meet me halfway.”

Users often feel:

- Misunderstood or dismissed
- Shamed for needing clarity
- Frustrated by inaccessible tech
- Overwhelmed when support systems fail them

Solution: Assistive AI Platform

A conversation-first platform offering:

- **Scripted guidance** for complex tasks [bills, insurance, appointments]
- **Multimodal interaction:** text, voice, large print, video assist
- **Emotionally aware UX:** pause, retry, reassure, reflect
- **Caregiver dashboards** and **enterprise-ready scripting tools**

Key Persona and Needs

ICP	Core Need	Emotional Goal
Seniors	Simplicity, safety, clarity	Feel capable & in control
Neurodivergent	Pacing, sensory safety	Be understood & respected
Physically Disabled	Accessibility & flexibility	Navigate tasks with dignity
Mental Illness	Low-pressure engagement	Maintain autonomy & calm
Caregivers	Visibility & relief	Support without burnout
Institutions	Prepared users, reduced calls	Improve outcomes, reduce friction

How We're Different

Feature

Status Quo

Our Approach

Multimodal
Support

Siloed, task-specific
apps

Integrated, real-time adaptation

Emotional
Intelligence

Robotic or rushed UX

Pause, rephrase, reflect UX layers

Caregiver Tools

Fragmented, manual

Central dashboards with oversight

Institutional Fit

High call burden

Scripted, clear user prep before
contact

Marketing Opportunity

- \$7–10B across assistive, mental health, and age-tech markets
- 14–20% annual growth
- Aging population + care gap = surging demand
- Policy and payor alignment with accessible tech and aging-in-place goals

Traction / Pilot Readiness

- Early-stage prototypes in testing
- High resonance from:
 - AARP groups
 - Disability advocates
 - Case managers and utility CX leaders

Positioned for pilots with: **Medicare Advantage, public utilities, smart TV platforms**

Traction / Pilot Readiness

- **B2C** via App Store, caregiver networks
- **B2B2C** through insurers, city programs, nonprofits
- **Partnerships:** Aging-in-place orgs, neurodivergent communities, device makers

Closing: Our Promise

**Support should feel like
empowerment—not surrender.**

We build tools that **listen, adapt, and
restore confidence**—not just complete
tasks.

TRUEVOICE

The smart assistant built for people who struggle to be heard

- ✓ Seniors
- ✓ People with disabilities
- ✓ ESL Speakers

Because everyone deserves to be understood.

Customer Service should feel like empowerment—not surrender.

We build tools that **listen, adapt, and restore confidence**—not just complete tasks
